

HANIEH SOTUDEH

A Selection of projects during my work at HKS, Inc. between 2023-2026 as
Design professional I & Architect I.

Cooper Hospital

- 01 Tower A
- 02 Benson Tower

WellSpan Hospital at York

- 03 Blood Bank
- 04 MRI Expansion
- 05 IR 1 & 2 Rendering
- 06 Cathlab 5 Expansion

Inova Fairfax Medical Center

- 07 Wayfinding
- 08 Donor Recovery Center
- 09 Locker Room

Pursuit

- 10 Baltimore Washington Medical Center

Future Facade Competition

- 11 The Breathing Threshold

COOPER TOWER A

01 — PROJECT INFORMATION

FIRM

HKS Architects

LOCATION

Camden, NJ

PROGRAM

Bed Tower

RENDERING

YEAR

2023

AREA

335,000 SF

STATUS

Under Construction

FIG. 01 — EXTERIOR RENDERING

03 — PROJECT DESCRIPTION

Phase One of a multiphase project at Cooper University Hospital:

Bed Tower Expansion of 335,000 SF, 10-story, 93 beds with 96,000 shell space.

RESPONSIBILITIES

- Reviewed and answered RFIs, submittals, and shop drawings; provided sketches to clarify intent for the contractor.
- Supported document revisions during bulletin issuances.
- Created scope-of-work diagrams for the owner.
- Performed detailing and 3D modeling to capture CA changes and DCA issuances.

BENSON TOWER

YEAR

2030

AREA

300,000 SF
(132 Bed)

STATUS

Schematic Design

FIG. 01 — WHITE BOX RENDERING FOR MASSING STUDY

03 — PROJECT DESCRIPTION

Campus bed tower expansion at Cooper University Hospital, adding Emergency Department, surgical, and administrative capacity to the existing campus. The plan is anchored by a new 10-story (30,000 SF/floor) comprising one ED floor, one administrative and cafeteria floor, one Surgical and prep/recovery, one mechanical floor, and six bed floors (one occupied at opening and five shelled for future expansion), along with supporting scope to enable the expansion.

RESPONSIBILITIES

- Serving as BIM Manager on the technical side of the project.
- Collaborating on the design team developing the tower's exterior design.
- Ran Forma analysis on proposed massing options to evaluate site and building performance.
- 3D-printed the physical study models.
- Produced graphic diagrams and design options presented to the client.
- Oversaw an intern producing 3D-printed massing options and graphic diagrams.

WAYFINDING

02 — RENDERINGS

FIG. 01 — PROPOSED CONSOLIDATION TO A SINGLE UNIFIED ENTRY POINT

FIG. 02 — SIMPLIFIED LOBBY EXPERIENCE

FIG. 03 — SIMPLIFIED COMMON AREA

03 — PROJECT DESCRIPTION

Comprehensive assessment and improvement plan for signage and wayfinding at two hospital campuses at Inova Fairfax Medical Campus (IFMC) and Inova Center for Personalized Health (ICPH)

ADDITIONAL CONTEXT

[Rendering & Diagrams](#)

RESPONSIBILITIES

- Developed a wayfinding and signage assessment and improvement plan across two hospital campuses.
- Mapped patient/visitor journeys to tens of destinations during site visits with the signage consultant; produced diagrams for each
- Created campus-wide diagrams and master plan presentations for Triad and FPIC meetings.
- Produced exterior and interior renderings using an AI workflow in place of 3D modeling

DONOR RECOVERY CENTER

01 — PROJECT INFORMATION

FIRM

HKS Architects

LOCATION

Fairfax, VA

PROGRAM

ORs, organ
preservation lab

PHOTOGRAPHY

© Evan Thomas

YEAR

2024

AREA

14,900 SF

STATUS

Completed

FIG. 01 — SURGICAL ROOM

03 — PROJECT DESCRIPTION

14,900 sf renovation including donor recovery ORs, organ preservation lab, biomed workspace, IT suite and support spaces

ADDITIONAL CONTEXT

[Renderings & Permit Drawing](#)

RESPONSIBILITIES

- *Attended user group meetings and consultant coordination calls; prepared minutes and coordinated consultant work.*
- *Developed design options and floor plan layouts for user and stakeholder review.*
- *Participated in site survey to document existing conditions*
- *Supported BIM modeling and documentation across SD, DD, and CD phases.*
- *Coordinated finishes and medical equipment review across the drawing set.*
- *Produced Enscape renderings to communicate design intent.*

Locker Room

01 — PROJECT INFORMATION

COMPLETION YEAR

2024

AREA

5,000 SF

STATUS

Completed

02 — PHOTOGRAPHY

FIG. 02 — LOCKER AREA

FIG. 03 — LOUNGE AREA

03 — PROJECT DESCRIPTION

Expansion of Locker Rooms,
Training Area and Lounge
of Inova Fairfax Medical
Campus

RESPONSIBILITIES

- Attended user group meetings and consultant coordination calls, preparing meeting minutes and helping coordinate consultant work
- Supported space programming and test-fits to validate department layouts against user needs.
- Supported BIM model development and project documentation across SD, DD, and CD phases
- Coordinated finishes and equipment, across the drawing set

ADDITIONAL CONTEXT

RENDERING

In House,
Hanieh Sotudeh

COMPLETION YEAR

2024

AREA

9,400 SF

STATUS

Completed

FIG. 01 — BLOOD BANK

03 — PROJECT DESCRIPTION

Relocation of existing blood bank to the second floor to meet requirements of the lab master plan study and the new proposed surgical tower

ADDITIONAL CONTEXT

[Renderings & Permit Drawing](#)

RESPONSIBILITIES

- Created Enscape renderings to communicate design intent to clients and project stakeholders
- Supported project documentation across SD, DD, and CD phases, and assisted with ASI issuances during construction administration.
- Attended user group meetings and consultant coordination calls, preparing meeting minutes and helping coordinate consultant work
- Supported space programming and test-fits to validate department layouts against clinical needs

MRI EXPANSION

01 — PROJECT INFORMATION

FIRM

HKS Architects

LOCATION

York, PA

PROGRAM

MRI

RENDERING

In House,

COMPLETION YEAR

2026

AREA

3,000 SF

STATUS

Completed

02 — RENDERING

FIG. 01 — RENDERING FROM MRI SUITE

03 — PROJECT DESCRIPTION

3,000 sf renovation of an MRI suite including the addition of a 1.5T MRI Class 2 imaging room, upgrades to staff areas, outpatient waiting, inpatient nursing stations, MRI control rooms, and support spaces.

RESPONSIBILITIES

- Created Enscape renderings to communicate design intent to clients and project stakeholders
- Supported Project Documentation from SD through CD and assisted with CA in ASI issuances.
- Compiled record drawings to capture as-built conditions for closeout

ADDITIONAL CONTEXT

[Renderings and Permit Drawing](#)

FIG. 01 — IR SINGLE PLANE ROOM

FIG. 02 — PACU TEAM STATION

FIG. 03 — IR BI-PLANE ROOM

03 — PROJECT DESCRIPTION

Phased relocation of two interventional radiology rooms to new suite that will include a single-plane and a bi-plane room, two procedure rooms and appropriate support spaces per FGI Guidelines.

RESPONSIBILITIES

- Created Enscape renderings to communicate design intent to clients and project stakeholders
- Supported construction administration through ASI issuance, resolving field and design clarifications
- Compiled record drawings to capture as-built conditions for closeout
- Assisted with Punch List

ADDITIONAL CONTEXT

02 — DIAGRAMS

FIG. 01 — FORM ANALYSIS OF PROPOSED MASSING OPTIONS

FIG. 02 — DIAGRAMS OF PROPOSED MASSING OPTIONS

03 — PROJECT DESCRIPTION

Pursuit for a 10-year campus master plan expansion at the BWMC, adding inpatient and outpatient capacity to the existing campus. The plan is anchored by a new 8-story Bed Tower (25,410 SF/floor) — 3 inpatient floors, 2 clinical support floors, and 4 floors of future-conversion shell space. Plus additional scope to support this expansion.

ADDITIONAL CONTEXT

[Physical Model & diagrams](#)

RESPONSIBILITIES

- Directed junior staff in the production of a 3D Printed physical massing model of the proposed campus expansion.
- Supported the interview team by developing massing studies, site plan diagrams, and presentation graphics.
- Ran Forma analysis on proposed massing options to evaluate and compare site/building performance.
- Contributed to interview and presentation preparation, including assembly and coordination of visual deliverables.

The Breathing Threshold

01 — PROJECT INFORMATION

FIRM

HKS Architects

LOCATION

District of Columbia

STATUS

Competition,
not-selected

RENDERING

In House,
Hanieh Sotudeh

02 — RENDERING

FIG. 01 — EXTERIOR VIEW OF FACADE

03 — PROJECT DESCRIPTION

“The Breathing Threshold” reimagines an outdated office building as high-performing multifamily housing, treating the residential façade as an active, breathing system rather than a static enclosure. Developed in a 6-week sprint, the proposal balances resident well-being, energy performance, and market practicality.

ADDITIONAL CONTEXT

[Full Presentation](#)

RESPONSIBILITIES

- Collaborated in a two-person team to design an adaptive reuse residential façade, leading the panel design portion of the work.
- Ran environmental performance analysis in Grasshopper to inform and validate design decisions.
- Optimized panel design to respond to the specific site location and climate conditions.
- Scripted the parametric panel façade system.
- Produced graphics communicating panel design and environmental performance.
- Generated AI-assisted renderings (Gemini) to convey the final design intent.
